Safe management of offshore supply and anchor handling operations

NWEA Common Guidelines

Guidelines for the safe management of offshore supply and anchor handling operations (NW European Area)

The North West European Area (NWEA) Guidelines for the Safe Management of Offshore Supply and Anchor Handling Operations were developed in 2006 as a joint project between maritime and offshore organisations in Denmark, the Netherlands, Norway and the UK. Following this issue, [The Norwegian Oil Industry Association, OLF](#), withdrew its Guideline 061.

The same parties are currently revising the NWEA guidelines, and it is expected that the updated version will become available on this web site in the autumn of 2008. OLF then plan to withdraw its guidelines 061A and B.
